Technical Skills

- React.js / React native
- Angular
- AWS Cloud
- Python / Django
- NodeJS / Express
- PHP / Laravel
- Java
- Redux / Redux-Saga / Redux-form
- SQL and NoSQL Databases
- HTML / CSS / JavaScript / Bootstrap
- C / C++/ C#
- Unix / Linux / Windows OS
- SSO Technology

Education

2016-09 - 2019-08

Computer Engineering Technology / Seneca College
GPA: 3.5/4.0

- Gained extensive experience with Microcontrollers and programming languages like C,C++ etc.
- Study of Computer Network Design, Network Servers, and Installation.

Software developer with hands-on experience in software development with depth knowledge of AWS, HTML, CSS, JavaScript, Angular, JQuery, React, AJAX, Django, Laravel, Java, and JSON. Well-versed in MVC Web application migration from server to client. Has the ability to understand and transform complex business requirements into software, ensuring applications are delivered on time, to specification, are scalable, performance optimized and maintainable. A highly motivated individual who is always learning, **able to work with tight deadlines**, and who can communicate effectively with technical peers as well as business users.

Work Experience

2018-05 - 2019-01

Software Developer
Novramedia Inc.

- Designed, developed and delivered a highly scalable and available user check-in application that managed client reservations for a large multinational bank.
- Utilized Javascript frameworks and AJAX on the front-end to optimize the rendering process of the tables thereby reducing processing time by over 60%.
- Contributed to solutions design and testing along with creation of technical documentation, systems flow charts and procedures.
- Created registration forms to gather customer information and used REST APIs to interact with NoSQL Database.

2020-03 - present

Barista
Starbucks

- Worked proactively in a fast-paced high volume environment to provide quality beverages and food products consistently for more than 200 customers a day.
- Demonstrated great teamwork by communicating and cooperating with co-workers resulting in faster customer service.
- Assisted in the decision making process of customer's purchases, upsold and increased sales volume of the store while catering to customer's core needs.
- Delivered personal connections with customers to foster long term customer relations and deliver consistent high quality service.

Software Projects

AWS Serverless Audiobooks and Real-time voice translation Application

- Architected and developed a highly scalable microservices based architecture that uses AWS Cognito, API Gateway, Lambda functions, SNS, CloudWatch, DynamoDB, Polly and S3.
- The AWS based serverless web application Audiobooks convert users text into lifelike speech offering over 20 languages and 50 human-like voice types to select from

Seoul Economy News App

<https://play.google.com/store/apps/details?id=sedailythumb.sednews&hl=en>

- Built a hybrid news app based on React native with over 10,000 user downloads.
- Used Webview to display web contents inside the application.

Reservation Management System

- The React based web application managed the data for reservation or walk-in appointment made by Kiosk System with SSO technology.
- Developed Notification System using AWS Cognito, Lambda, SNS, CloudWatch, and DynamoDB.

Phone Book Application

- Automatically populate data on the table using React when a user inserts brief personal information like number and name.
- Managed and filtered the data that user entered by Redux.
